Monitor your business anytime anywhere  **Smart**

Know the ins and outs of *your business – 24 / 7*

Stay sharp with Smart Backend! Regardless of whether you have one outlet or multiple outlets, it is imperative to remain on top of accounts and stock count and be able to access these important data immediately. By knowing the stock and finance levels, you will be better equipped to make quick and informed decisions.

Why do I need the Smart Backend system?

- Fully-integrated inventory system that reduces your workload as you eliminate the need for double entries
- Integrated Module enable auto account, reduce human errors, increase accuracy
- Accumulated accounting for multiple outlets
- Monitor everything, from inventory to your accounts, via reports

BizSQL Accounting
Be info-ready!

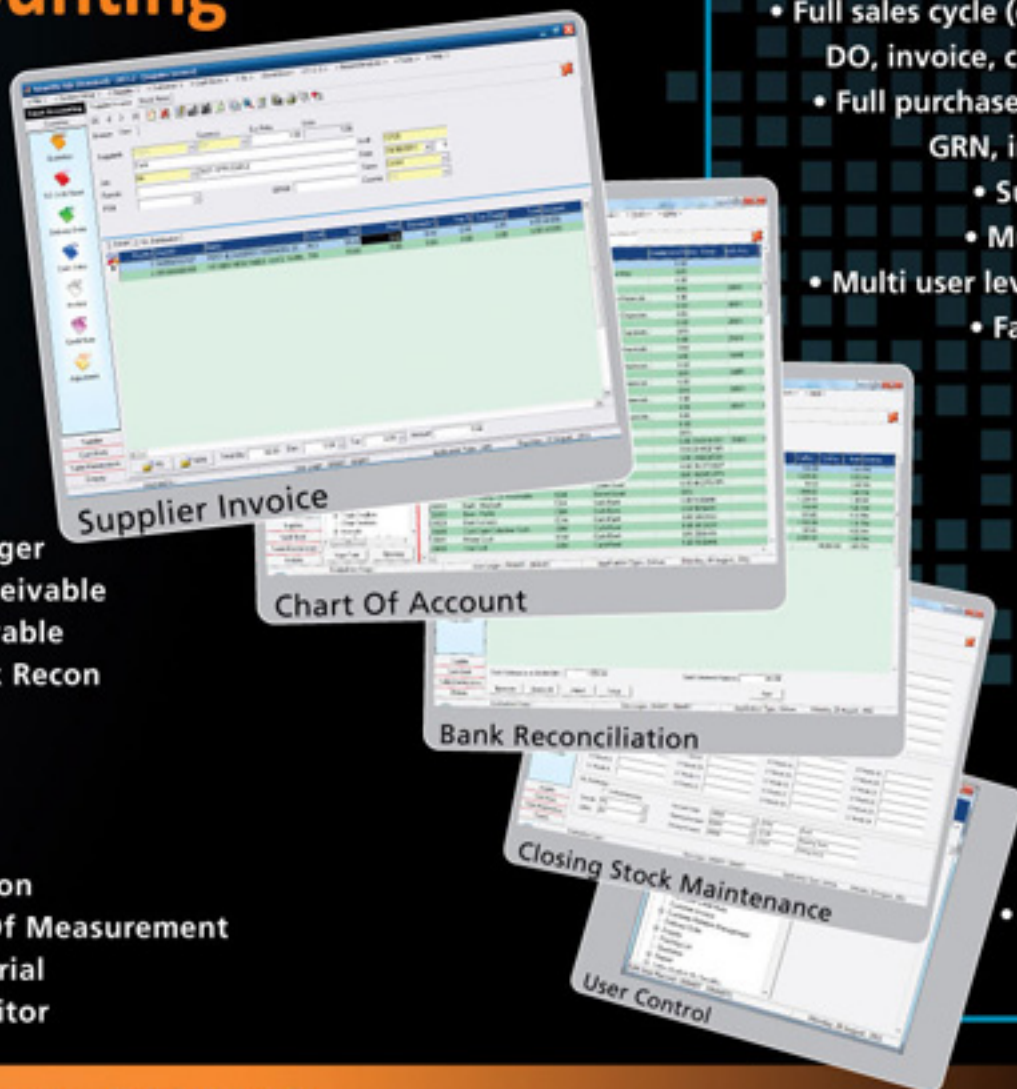

Smart SQL Accounting

In a few quick easy steps, you can set up this system. It ensures that you are aware of any anomalies between the accounting figures and stock level. You will also be in-the-know of your business' bottom line at all times, which is crucial, should you need to amend your business plans.

Benefits

- Auto-posting for accounts, reduce workload & minimize mistakes
- Great efficiently thru the integrated modules
 - User friendly to use & learn
 - User access control
 - Accurate & immediate information
- Stable MSSQL data & schedule backup
- Online sync of multiple location data, immediate info from anywhere
